**Kenya** is the most affected country in a Africa by the Malaria and have the highest average deaths every year by 27,896 and every day by 76.43, From that dashboard, I clicked on Kenya on the map, this showed deaths due to malaria for each year from 2000 to 2014 and in the year 2003 the number of deaths by the Malaria reached to the highest number ever since 2000 by more than 50K death then after that start fallen until it reached below 1K by the year 2014.

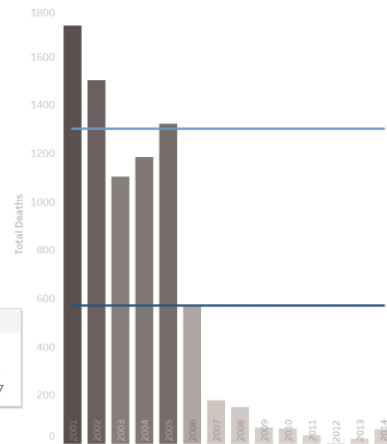

Chad one of the lowest country's that affected by the malaria with average of deaths every year by 875 and every day by 2.40, but after I clicked on Chad on the map from the dashboard, this showed deaths due to malaria for each year from 2000 to 2014 and I noticed that deaths number per year starts doubling since the year 2010 until 2013.

Malaria Deaths in Africa: 2000-2014

Which countries are most affected?

How have the number of malaria deaths changed over time in **Namibia**?

Namibia
Average deaths every year:	572
Average deaths every day:	1.57

Namibia deaths per year numbers have start to fall since the year 2000, after I clicked on namibia on the map, this showed deaths due to malaria for each year from 2000 to 2014 and from 2000 to 2003 the numbers start to drop by 300-400 and after 2005 the numbers start to drop significantly by more than half until the 2012 when It reached the lowest numbers ever since 2000.
